

卷之三

GENERAL NOTES:

- H**ISTORICAL AND PHYSICAL ASPECTS OF THE
WATERSHED. The study area is located in the northern part of the state of Michigan. It is bounded by the Huron River to the west, the Flint River to the east, and the Saginaw River to the south. The terrain is characterized by rolling hills and low ridges, with numerous small streams and creeks flowing through the landscape. The climate is typical of the Great Lakes region, with cold winters and warm summers. The study area is primarily agricultural, with a mix of corn, soybean, and small grain cultivation. There are also some forested areas and urban centers, such as Flint and Saginaw, located within the watershed.
